

Butler County Imaging Center

Campus Addition

Architect: PFB Architects
Duration: 8 Months

Prexus Health Partners' Hamilton campus includes a surgery center, dialysis center, and medical and administrative offices. Oswald built a 24,000 SF imaging center addition onto the existing surgery center. This state-of-the-art facility, comprised of mainly radius walls, includes a digital x-ray machine, one of ten of its kind in the U. S. The imaging center also has mammography, fluoroscopy, phlebotomy, nuclear medicine, CT-scan, and MRI rooms, as well as a light-filled Physical Therapy area. The striking rotunda at the building's entrance has wood paneled ceilings and a pyramid-shaped skylight.
