

Honda East

Renovation & Addition

The project included a 9,000 SF renovation and a 900 SF addition to the service department waiting area, showroom, and building exterior. The project was done in three phases so the owner could maintain normal customer relations. Oswald worked very closely with the owner and architect to ensure that all parties were very satisfied.

Architect: Robert Treadon & Associates
Duration: 5 Months

“Oswald delivered the project without halting our day-to-day operations - a vital necessity in a retail business.”

-Bill Woeste, Jr., President
