

Kroger Blue Ash Technical Center

Interior Renovation

Architect: Samuel Boulmetis Architects

Duration: 11 Months

Kroger needed to renovate this 40+ year-old 200,000 SF office building to consolidate their IT operations. Oswald completed the renovation in five phases over the course of 10 months while keeping occupied spaces fully functional. The Technical Center includes: a Special Operations Center that oversees all the Kroger stores in the region; several conference and training rooms; work areas for 900 employees; and a full service cafeteria. Every move-in deadline was met, and the project was completed under budget despite many design changes.
