

Administration & Fire Department HQ Complex

Architect: MSA
Duration: 10 Months

This 30,000 SF multi-use complex has a brick veneer with wood siding and a shingled roof. The existing administration building now connects to the new complex, which houses some administrative offices as well. The basement includes a fitness room and training room/Emergency Operations Center. Furthermore, the complex includes offices, sleeping quarters, kitchen/dining room, and a large apparatus bay.

“Oswald’s staff, to a person, take personal ownership of the projects they work on and dedicate themselves to the success of the projects and the satisfaction of their customers. Oswald has not only met, but has generally exceeded, my rather lofty expectations of a construction manager.”

-Laura A. Abrams, Law Director for Springfield Township
